

Series DWR
Dispenser for self-adhesive labels

Series DWR

DWR 100

DWR, developed to suit industrial application, is a semi-automatic dispenser for self-adhesive labels fed in rolls. Fully made of steel, it is easy to operate, is flexible and suitable for any type of label commonly in use.

DWR is available in 2 widths:

- up to 100 mm - up to 200 mm

The roll holder can be adapted to any core type and can accept rolls up to 300 mm in diameter; thus offering long operation autonomy. The labels are read by two self-learning sensor microprocessor controlled. They can automatically identify the difference in transparency existing between the label and the paper support, hence presenting the label on the peeler bar almost fully peeled off. After the removal of a label from the paper support, the next label will stick out automatically. Furthermore, the control card to stop the motor rotation when the roll is over or in case of paper tear, and afterwards it will give out an acoustic signal. Also available are an electromechanical detection device for transparent labels and a pre-selection counter. The battery operated version makes it possible

to work for about 4 hours with no mains power. Supply voltage 230 V or 115 V on request. The battery operated dispenser does not require a separate power supply unit since the battery charger is alongside the control card.

Technical Features

	DWR 100	DWR 200
Label width	15-100 mm	15-200 mm
Label length	15-600 mm	15-600 mm
Speed	10-15 m/m	10-15 m/m
Roll diameter	300 mm	300 mm
Core diameter	38-110 mm	38-110 mm
Supply voltage	230 Vac - 50 Hz	230 Vac - 50 Hz
Power consumption	30 W	30 W
Overall dimensions	330 x 410 x 370 (H)	430 x 410 x 370 (H)
Weight	9,7 Kg	11 Kg
